Customers

Initially, **ATL** supplied gas to household consumers with cash terms but over the years the company began diversifying its customer's base to industrial users. ATL customers include households, factories, hotels, restaurants and residential schools and colleges. Some of its clientele diversification of the customer base is ongoing and this has resulted in the steady increase in sales over the past years.

MIRA 14 KG

is the most common cooking fuel in Malaysia urban areas, being used in virtually all households. MIRA14 KG is suitable for domestic and commercial applications because it can be easily transported. In addition, it can make cooking session much easier, no matter if you are using the hob ,oven tabletop, double burner & single burner.

MIRA 50KG

cylinder is widely used in manufacturing and processing industry such as hotels, factory, resorts and food courts. It is because 50KG cylinder contains much more capacity of gases which is suitable for burners, boiler, dryer, kilns, high capacity oven, stove cookers, water heaters and others.
